

## Total No. of Project | 321

- Southern Region
- Central Region
- Northern Region
- Minor Improvement
- Digitalization
- SAWAS Villages

### PHASE 1 : 2019-2020

- Water Stressed Area Project will deliver immediate relief plus build some part of the grid

### PHASE 2 : 2021-2025

- To achieve the Sarawak Government's target of 100% treated water supply coverage for the whole of Sarawak by 2025.
- Water grid is constructed to cater for water demand up to the year 2040.

### PHASE 3 : 2035-2040

- Water Grid is upgraded to cater for water demand up to year 2070.

## WHAT IS PROJEK RAKYAT?

Sarawak Water Grid Programme- Stressed areas  
The extension of pipelines to communities which can be connected to the existing water supply network.

## GOAL

- Strengthen and reinforce water supply.
- To resolve water supply reliability issues, particularly those in water stressed areas

## OBJECTIVE

To propose a strategy and master plan to optimize the use of natural fresh potable water supply for the consumption of all communities in Sarawak the immediate term, medium term (up to 2040) and long term (up to 2070), which includes a state-wide water grid strategy.

## COMPONENTS

- Water Treatment Plants (WTP)
- Reservoirs
- Pipelines
- Booster Stations

## BENEFITS

- Maximise the utilisation of raw water abstraction from rivers as a source of potable water.
- Operating a smart water grid system is more reliable, effort and economical than the current practice of separate schemes.
- Ensures 100% coverage of treated water supply to Sarawak population by 2025 using Grid and SAWAS.
- Ensures the security for potable water in Sarawak for the next 50 years up to 2070 and beyond.
